

Meet one of our newest CPAs!

“You need to have a mindset to take the challenge, because the CPA is not an easy way, but it is worth the effort to pursue it.”

When Ming Zhong isn't working with numbers, you might find him photographing the fields and shores of PEI.

With his love of aesthetics, Zhong can find beauty in an impeccable financial statement. His CPA training helps him analyze the bigger picture — beyond the details of accounting to how those details can be used.

Ming Zhong, CPA, BBA

As Financial Controller and Office Manager at North Lake Fisheries (2013) Inc. in Montague, Zhong analyzes and reports data, participates in budgeting, evaluates financial risks, and oversees areas including accounting, human resources, and import-export documentation.

Zhong obtained a Diploma of Business Administration at the East China University of Science and Technology in Shanghai in 2010 before moving to PEI in 2011. Seeing the Island as a welcoming place to study and to practise English, he completed a Bachelor of Business Administration with an Accounting Specialization at UPEI in 2015. He became an Accountant at North Lake Fisheries (2013) the same year.

When the Controller position became available, Zhong told the business owner of his intentions to study for a CPA and persuaded his way into a promotion in 2017.

Zhong, who lives in Stratford, wants to continue exploring opportunities with his current employer. His CPA, completed in 2020, adds to his abilities to think strategically and solve problems. The training also supports his efforts to keep on learning — he now plans to start a Master of Business Administration.
